V-Shape Groove Cut Stainless Steel Bending

Sunshine's V-Groove Bending

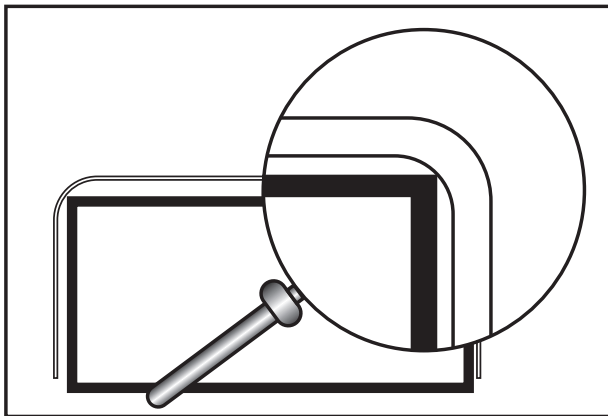

Fig.1

Conventional Bending

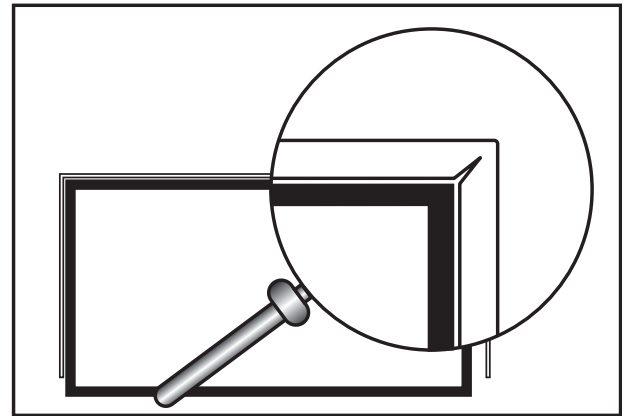

Fig. 2

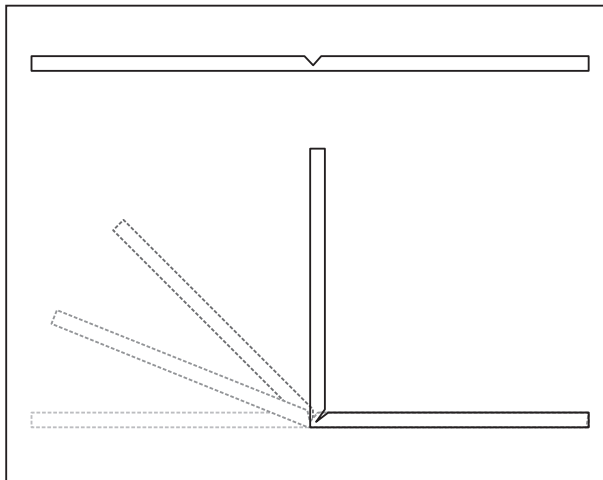

Fig. 3

A Sunshine Stainless & Fabrication presents **V-Shape groove cutting** in stainless steel bending (Fig.3). We use V-shape groove cut technology to minimize the radius in stainless sheet bending. Conventional bending forms large radius (fig.2) at corner, but with V-shape groove technic, there are very small radius (fig.1) form at the corner. We could make (Bend) any shape, size and any quantity, which is very useful for store front cladding.
